III. Therigy summary note template for refill and clinical calls (highlight differences b/t Austin and MI's queue)

Welcome Packet Information for Michigan:

MI Specialty Pharmacy is currently pursuing ACHC accreditation. To be able to meet one of the various components of the accreditation process, we are asking that all embedded team members reserve the PCC/medication delivery calls for the MI and Austin centralized clinical teams. ACHC is very specific about the notation/documentation of the **Welcome Packet**, the NOPP, and about obtaining patients' emergency contact **information**. Our centralized pharmacists will be ensuring that we are achieving these objectives while making appropriate documentation within Therigy.

To help with the above, we will need our clinical pharmacists to follow the process below if the medication delivery is coming out of MI Specialty.

Upon onboarding a new patient:

- Inform the patient/caregiver that the patient will receive:
 - The **Welcome Packet** (a small booklet, the booklet also contains the NOPP)
 - The Patient Demographic Form
 - Release of **Information** Form
 - Consent to Receive Electronic Communications Form
- Ask the patient/caregiver to complete and return the above three forms to MI in the provided prepaid envelope
- Ask the patient/caregiver who they would like to list as an emergency contact
 - If the patient refuses, please state in the PCC summary note.

The above items should then be recorded in the patient's Therigy profile. For the **Welcome Packet**, please check the box and enter in the date the patient will receive the **packet** from the pharmacy.

Upon receipt of the completed forms, MI will be uploading these into the patient's Therigy profile as an attachment.

XII. Benefits Elevation Process

A benefits elevation is essentially a pharmacy benefits override from Cigna Smarthealth for the patient to fill their specialty medication at a non-Ascension specialty pharmacy.

Possible scenarios that require a benefits elevation:

- Neither Michigan or Texas have access to the medication
- Patient requires a secondary insurance that neither Michigan or Texas can process

How to create request:

1. Compose a new email addressed to Amy Torres (amy.torres@cigna.com) and Dan Elliott (daniel.elliott@ascension.org)
 - a. If a technician asked you to create the request, then you can BCC that technician on the email
2. Add "-PHI- Override Request" to the title line
3. Provide the following information in the body of the email
 - a. Patient name
 - b. Patient DOB

- c. Patient Cigna ID
 - d. Medication name (needs to have failed claim on file in Enterprise)
 - e. Reason for override
 - i. Also include name, address, and phone number of pharmacy that will be filling it if possible
4. Be sure to document in Therigy that the override request was sent (Patient summary and/or activity status)

XIII. Infusions

- Entyvio - this is via infusion or home infusion center:
