

Pharmacist Training Business Plan

Jennifer Cormier, PharmD

Andrew Tran, PharmD

Kacie Guerrette, PharmD

Objectives

- Present mission statement and goals of the resident training plan.
- Describe how to implement and distribute time during resident orientation period.
- Discuss required resources and staff that will be needed to implement plan.
- Explain competency assessments to measure resident progress.

Mission Statement

- Provide comprehensive, integrated primary health care services for all to improve the health and wellbeing of our patients and the Maine communities we serve.
- **Vision Statement**
 - ▮ The pharmacy team is dedicated to comprehensively training our incoming residents and pharmacists in order to provide safe, accurate, and timely pharmacy services when serving our patients in the community pharmacy.

Goals

- Increase capture rates by improving customer service and quality of overall patient care.
- Train pharmacy residents on how to staff each of the pharmacies during their orientation period.
- Create a standardized checklist for Pharmacists in charge to utilize while training residents and new pharmacists to facilitate a more uniform and comprehensive training experience.

Protocol & Implementation

Schedule

- PGY-1 Orientation Period: 5 weeks
- 2 weeks or ~ 80 hours: staffing training
- Training technician duties will be $\frac{3}{4}$ th the total time (60 hours).
- Training pharmacist duties and customer service will be $\frac{1}{4}$ th the total time (20 hours).
- Location
 - ▢ Brewer Medical Center Pharmacy (BMC) – 40 hours
 - ▢ Penobscot Community Health Center Pharmacy (PCHC) – 20 hours
 - ▢ Helen Hunt Health Center Pharmacy (HHHC) – 20 hours

Required Resources

- Pharmacist on duty (no additional cost)
 - ▢ *25% of time = 20 hours*
- Training technician (salary \$17/hour)
 - ▢ *75% of time = 60 hours*
- Pharmacy space/computer (back computer)
- Cost Estimation
 - ▢ $\sim \$17.00/\text{hour} \times 60 \text{ hours} = \$1,275$

Implementation

- Utilize Pharmacy Resident Training Checklist to assess competency.
- Each resident will review each competency with training technician and preceptor(s) during their orientation period.
- Residents will be expected to have minimum competency with technician checklist AND pharmacy resident checklist by the end of the orientation period.
- Staffing preceptor will have regular follow-ups throughout the residency year to ensure competencies are being met and improved upon.

Pharmacists Checklist

Checklist at a Glance

- The Pharmacy Resident Competency Checklist will:
 - ▢ Have some overlapping technician duties (opening/closing procedures, prescription processing, etc.).
 - ▢ Encompass QA step of filling process.
 - ▢ Include other foundations to being a pharmacist such as conflict resolution (communication) and technician management.
 - ▢ Incorporates conflicts and/or barriers that previous residents had difficulty with.

Training Areas

- Opening/Closing Procedures
- Prescription Processing
- Quality Assurance (QA)
- Counseling
- PCHC Programs (New Horizons, Hope Rising, etc.)
- Conflict Resolution
- Closing Reports
- Technician Management
- Misc.

Quality Assurance

QA
How to check PMP, how early can you fill.
What is required for a controlled prescription/ opioid
Drug interactions/ duplication
Allergies
Deactivate old prescriptions
How to log a C2
Emergency controlled fill
340b vs VHA
Referral
Visual verify
Transfers
Verbal orders
Emergency loaner fill
Partials/ Owed Rx

Conflict Resolution

Conflict resolution

Resolving discrepancies in quantity received (eye con)

Communication with next day staff

Who/when to contact frank and PIC

Always listen to customer/tech conversations

Stepping in when appropriate

Insurance, Mainecare back bills

Refunds

On back orders

Prior authorizations

Refill request forms

Wait times (always overestimate)

When to call patients to inform

Filled prescriptions (know reason why it's filled)

Look up transaction history

Called in prescriptions after close

Technician Management

Technician Management
Technician opening/closing procedure
Delegating workflow
How to train technicians
Technician coaching on patient interaction
Maintaining inventory

Competency Assessment

- Each item in the checklist will be Reviewed, Observed, Performed.
- At the “Performed” stage, the pharmacist should be given a Performance rating of 1-3:
 - ▢ 1: Unable to perform – needs re-training
 - ▢ 2: Able to perform with some help – needs training refresher
 - ▢ 3: Able to perform independently

Reviewed	Observed	Performed	Initials

Competency Assessment

- Reflections
 - ▢ End of week 2 - must identify an area for improvement
 - ▢ Designated 4 hours of their training time towards mastering this
 - ▢ Quarterly reflection – Name an area of practice that the resident would like more experience with, or an area of practice that the resident has questions about.
 - ▢ Interns and Weekend/Closing Technicians can provide anonymous feedback as well.
- The staffing preceptor must evaluate the pharmacy resident quarterly by providing an area of strength and an area for improvement to the resident.

Key Points

- It is our hope that implementing a standardized training plan for residents will decrease medication errors, customer complaints, and gaps in knowledge in pharmacy staffing.
- Using the resident training checklist will assess competency in resident's ability to work independently as a pharmacist in the Community setting.
