

Bridge Plan Maker — Instructions

Perioperative Anticoagulation Bridge Planning & CrCl Calculator

How to Use the Bridge Plan Maker

- 1 Enter all the patient information necessary in the Patient Information Worksheet.
- 2 Select "Bridge Plan Printout" and change any information in the fields to match your instructions.
- 3 If you entered data into a field and it doesn't match what you wanted, close the spreadsheet and open a new bridge plan maker. Do not Save!
- 4 Verify the information is correct and print the active worksheet.

The bridge plan spreadsheet only allows for a maximum of 14 days of planning around the surgery date. If a longer plan is needed, please refer to the Microsoft Word template.

CrCl Calculator Instructions

- 1 Enter Height, Weight, Age, SCr, and Gender in each space. Must be in appropriate units.
- 2 All 5 fields must be filled for the CrCl Calculator to work.

If SCr is less than 1.0, a value of 1.0 will be used in the CrCl formula.

Color Key

	Manual entry — fields you fill in		Automatically calculated — do not edit
--	-----------------------------------	--	--

Tab Guide

	Instructions	You're here! How-to guide, CrCl calculator notes, and version history.
	Patient Information	Enter patient demographics, CrCl inputs, and case details here first.
	Bridge Plan Printout	Auto-generated, ready-to-print anticoagulation bridge schedule.
	References	Behind-the-scenes lookup tables that power the calculations — no need to edit.

Version History

Created by Mike De Luna		Version 1.0
Created on: 02/01/2011		Last edit: 06/28/2012
Updated by Jonathan Lewis, Program Manager 2 (not a pharmacist)		Version 1.1
Created on: 07/23/2024		Last edit: 07/24/2024
Updated by Andrew Tran, PharmD, BCACP, BCPS		Version 1.2
Created on: 08/03/2026		Last edit: 08/03/2026

Update Log

Date	Update Notes
7/24/2024	Updated file to have "Next syringe size" automatically calculate from Lovenox dose, and correlating table on reference tab.
	Added column B to Bridge Plan Printout to calculate day of the week of column A.
	Moved all calculation/reference cells to References tab.
	Added color coding to Patient Information tab — all yellow fields are manually filled in, all teal fields are automatically calculated.
	All other calculations related to calculating pharmaceutical therapies and dosages remain unchanged.
8/3/2026	Visual redesign: refreshed color scheme, typography, borders, and print/page layout across all tabs for readability and a more professional, printable appearance. Fixed print/page setup so no content is cut off when printed. No formulas, values, or calculations were changed.
