PROFESSIONAL SUMMARY

Ambulatory care clinical pharmacist with 7+ years of experience providing comprehensive medication management and chronic disease state management across FQHCs, health-system clinics, and specialty and remote pharmacy settings. Board certified in ambulatory care (BCACP) and pharmacotherapy (BCPS), with additional certification as a CDCEs. Skilled in managing large patient panels under collaborative practice agreements, driving measurable clinical outcomes, and developing protocols that standardize care delivery. Licensed in Texas, Louisiana, Michigan, and Oregon.

EDUCATION

PGY-1 Community Pharmacy Residency – Ambulatory Care Focus <i>Penobscot Community Health Care(PCHC)</i>	06/2018 - 06/2019 Bangor, ME
Doctor of Pharmacy; Cum Laude <i>Texas A&M Irma Lerma Rangel College of Pharmacy</i>	08/2013 - 05/2017 Kingsville, TX

PROFESSIONAL WORK EXPERIENCE

Clinical Pharmacist - Engage team <i>Stellus RX</i> Associate Manager – Nishat Baset, PharmD	08/2026 – Present Remote
---	-----------------------------

- Provide comprehensive medication management (CMM) through telephonic and virtual/video patient encounters within Stellus Rx's Engage model.
- Design individualized therapeutic regimens and chronic disease state management action plans with measurable clinical goals — contributing to a 25% decrease in the A1c-uncontrolled cohort and a 21% reduction in ER visits.
- Collaborate with physicians, health systems, and the care coordination team to develop and refine medication management protocols, documenting comprehensive medication reviews in the Engage platform and EnterpriseRx in compliance with regulatory standards.

Ambulatory Clinical Pharmacist III	02/2024 – 03/2026
Ambulatory Clinical Pharmacist II	11/2023 – 02/2024
Ambulatory Clinical Pharmacist I <i>Baylor Scott & White Health</i> Medical Director – Kathleen Halka, MD	07/2023 – 11/2023 Temple, TX

- Managed a chronic disease management and therapeutic monitoring panel of approximately 1,100 patients across a 30-mile service radius, averaging 40 patient medication interventions daily through in-person point-of-care visits, peri-operative care planning, medication access assistance, and hospital

discharge follow-up under a collaborative practice agreement.

- Served as clinical informatics lead for the anticoagulation service line, authoring a comprehensive 75-page Protocols and Procedures manual, updating the collaborative practice agreement governing drug therapy management, and generating a standardized clinical workflow to drive consistent and evidence-based care.
- Drove measurable clinical outcomes including a 26% improvement in time in therapeutic range (TTR) for anticoagulation patients and a 16% increase in guideline-directed statin prescribing, while supporting a pharmacist-led transitions-of-care home visit program that reduced 30-day hospital readmissions by 13 percentage points and generated an estimated \$1.46M in cost avoidance.

Specialty Clinical Pharmacist

Ascension Health

02/2022 – 02/2023

Austin, TX

Specialty Pharmacy Supervisor – Daniel Elliot, PharmD, BCPS

- Piloted and launched Ascension's new specialty pharmacy service line in Austin, spearheading development of the clinical protocols and Therigy-based workflows that were later adopted nationally, expanding the program's reach to 38 states.
- Served as Pharmacist-in-Charge across 3 states and as the team's pharmacy law compliance resource, maintaining active multi-state licensure in Texas, Michigan, Oregon, and Louisiana to support multi-state dispensing and regulatory operations.
- Delivered virtual and telephone-based pharmaceutical care for patients with complex, chronic, and rare conditions (oncology, rheumatology, dermatology, GI, hepatitis C, HIV), performing 30-40 patient calls daily while coordinating medication access and assessing regimen appropriateness through Therigy specialty pharmacy software.

Ambulatory Care Clinical Pharmacy Specialist

Parkland Health & Hospital System

02/2021 – 02/2022

Dallas, TX

Ambulatory Care Manager – Cortny Anderson, PharmD, BCPS

- Managed a primary care patient panel of approximately 600–700 patients under a collaborative practice agreement spanning 8 providers, seeing 15–20 patients daily and independently initiating, titrating, and refilling drug therapy for diabetes, hypertension, dyslipidemia, anticoagulation, heart failure, asthma/COPD, and other chronic conditions.
- Contributed to measurable improvements in patient outcomes across the ambulatory care pharmacy program, including A1c reductions of up to 2.3%, LDL reductions of up to 9.1 mg/dL, and guideline-directed diabetes therapy rates above 74% for ACEI/ARB and 83% for statin use.
- Facilitated Healthy Living with Diabetes (HWLD) group education classes and served as a medication access resource, securing prior authorizations and coordinating prescription assistance to resolve insurance and affordability barriers for an underserved patient population.

Clinical Pharmacist

Baylor Scott & White Health

07/2019 – 01/2021

Temple, TX

Pharmacist Supervisor – Kim Baty, PharmD, BCPS

- Delivered clinical pharmaceutical care to an outpatient clinic patient population, consulting with nursing and medical staff on medication orders, drug therapy, and patient response to ensure safe, effective care

in accordance with hospital policy and regulatory standards.

- Served as a clinical resource for pharmacy students and residents while upholding standards of patient safety and customer service in a fast-paced outpatient clinic environment.

PGY-1 Community Pharmacy Resident

06/2018 - 06/2019

Penobscot Community Health Care(PCHC)

Bangor, ME

Residency Director – Frank McGrady, PharmD, BCPS

- Delivered comprehensive medication management for a chronic disease patient panel of 15–30 patients per day across ambulatory care rotations at three FQHC sites, managing diabetes, hypertension, and other chronic conditions under collaborative practice agreements.
- Completed 460+ hours of community pharmacy staffing alongside rotations in Transitions of Care, Administration, Population Health Management, and Patient-Centered Dispensing, gaining integrated exposure to direct patient care and pharmacy operations.
- Led a research project evaluating DOAC utilization and implementing a pharmacist-led DOAC telephone clinic at an outpatient FQHC, and served on the Controlled Substance Stewardship and High Utilizer Group interdisciplinary committees to advance medication safety.

Staff Pharmacist

08/2017 – 05/2018

Walmart Pharmacy Store #476

Gatesville, TX

Pharmacist-in-Charge – Kelley Raley, PharmD

- Led a team of 6 pharmacy technicians in accurately processing and dispensing a weekly volume of 1,500–1,800 prescriptions, counseling patients on medication use, safety, and healthcare needs.
- Administered immunizations and company-sponsored health programs while ensuring full compliance with HIPAA, PHI, and regulatory standards, modeling best-practice customer service and providing guidance to pharmacy staff.

PROJECTS

Baylor Scott & White Anticoagulation Clinic Protocol and Procedures

02/2024 – 02/2026

Temple, TX

- Sole author and developer of the clinic's protocol and procedures manual — revising, combining, and updating procedural documents spanning 1997–2023 into one comprehensive document to streamline and standardize responsibilities across the anticoagulation clinic.

Ascension Specialty Team Procedures

02/2022 – 10/2022

Austin, TX

- Contributor on the pioneering Ascension Specialty Mail Order team — developed the policies and procedures governing the workflow and standard operations for the pharmacy team.

Business Plan for Clinical Pharmacy Service

10/2021

Waco, TX

- Proposal to implement an ambulatory care pharmacy service line at an FQHC in Waco, Texas — an ambulatory care pharmacist position co-founded by Texas A&M College of Pharmacy and Waco Family

Medicine to see patients and precept pharmacy students.

PGY-1 Residency Project:
Evaluation of Direct Oral Anticoagulant Use and Implementation of Pharmacist-led Direct Oral Anticoagulant Telephone Clinic in an Outpatient Federally Qualified Health Center

06/2018 – 06/2019
Bangor, ME

- To evaluate the prescribing patterns around DOACs in an outpatient teaching clinic and to implement a pharmacist-led intervention to potentially improve patient outcomes.
