

50-State Pharmacy Law Compliance Reference

Purpose

A working reference of pharmacist-in-charge (PIC), pharmacy/pharmacist licensure, controlled-substance, and prescription-label requirements across all 50 states + DC. Built from two prior internal spreadsheets ("Labeling Requirements by State" and "Multi-State Notice Requirements", both originally compiled circa 2020-2024 for nonresident pharmacy licensing work) plus new research to fill gaps and extend coverage to all 51 jurisdictions.

⚠ Not legal advice — verify before relying on this

This is a research aid, not a substitute for legal counsel. Pharmacy law changes frequently — fees, renewal cycles, PMP reporting frequency, and controlled-substance scheduling in particular. A meaningful share of the underlying source data is dated (~2020-2021 for PIC-change timelines, CS flags, and license renewal cycles; ~2022-2024 for the original label-requirement text). Every cell with a citation should be checked against the current statute/regulation before you act on it — cross-reference with your compliance/legal team or the state board of pharmacy directly. Cells with no confirmed citation say so explicitly ("verify with board") rather than guessing at a statute number.

How each column was built

PIC Requirements / Citation

General PIC-designation requirement (near-universal across states) + the specific PIC/officer change-notification timeline pulled from prior compliance research. California additionally reflects a new nonresident-PIC licensure rule taking effect 7/1/2026.

Pharmacy License Requirements / Notes

General in-state + nonresident pharmacy licensure requirement, plus license duration/renewal-cycle pattern from the original renewal-tracking sheet (~2020 data — cycle pattern is usually stable, but the dollar fee shown, where present, should be treated as historical, not current).

Pharmacist License Requirements / Citation

General NAPLEX + jurisprudence-exam pathway (NABP-administered), noting the handful of states known to run the own jurisprudence exam instead of the multistate MPJE (currently only California is flagged this way — double-check you rely on this for other states).

Controlled Substance Considerations / Citation

State-specific scheduling deviations from the federal CSA (e.g., gabapentin as Schedule V in some states) and PDMP/PMP registration & reporting requirements, drawn from the original compliance research plus, where available, full statutory PMP-reporting language.

Rx Label Requirements / Citation

Required label elements, drawn from the original labeling-requirements sheet where it had real content, and freshly researched with a specific regulatory citation for every state that sheet left blank.

Suggested next steps

1. Have your compliance/legal contact spot-check the ~15-20 highest-risk cells (PMP reporting frequency, CS scheduling quirks) against current board publications before operational use.
2. Replace "verify with board" placeholders with confirmed citations over time — treat this as a living document.
3. Re-check California's 2026 nonresident-PIC rule implementation status; it was in progress at last check.
4. Consider a periodic (e.g., annual) re-verification pass, since PMP/PDMP reporting rules and fees shift often.

Using this as a live Google Sheet

This is a reference table, not a calculator, so the whole sheet is protected in the shared version — there are no input cells to fill in. Use the column filters (View > Create a filter, or the existing filter arrows) to narrow down by state or search a citation.

Compiled by

Andrew Tran, PharmD, BCACP, BCPS — personal compliance reference project, last updated August 2026.

State	Abbr	PIC Requirements
Alabama	AL	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Alaska	AK	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board PIC- within 10 days of change. Officer-immediately.
Arizona	AZ	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board must give immediate notice and documented within 10 days of change.
Arkansas	AR	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 5 days of change.
California	CA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change. Effective July 1, 2026, nonresident (out-of-state/mail-order) pharmacies shipping into California must have a PIC who personally holds an individual California pharmacist license, alongside expanded state inspection authority over nonresident pharmacies.

Colorado	CO	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.
Connecticut	CT	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Delaware	DE	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board officers- within 30 days, Personnel- within 30 days, PIC- 10 days.
District of Columbia	DC	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.
Florida	FL	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.

Georgia	GA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board officers- immediately. PIC- within 3 or 10 days?.
Hawaii	HI	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Idaho	ID	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board change in PIC and employees: 10 days.
Illinois	IL	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.
Indiana	IN	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of PIC change.

Iowa	IA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board change in PIC within 10 days of change.
Kansas	KS	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 5 days of change.
Kentucky	KY	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change. Must report ANY change in personnel (including Rphs).
Louisiana	LA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 business days for PIC. 30 days for officers.
Maine	ME	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 7 days of change.

Maryland	MD	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change. Must report ANY change in personnel (including Rphs).
Massachusetts	MA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 business day for PIC.
Michigan	MI	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change for both PIC and officers.
Minnesota	MN	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Mississippi	MS	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Missouri	MO	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board "immediately".

Montana	MT	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 72 hours and then in writing within 30 days.
Nebraska	NE	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.
Nevada	NV	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board BEFORE change of PIC. Officer- immediately.
New Hampshire	NH	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.

New Jersey	NJ	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change.
New Mexico	NM	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
New York	NY	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law.
North Carolina	NC	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change (includes pharmacy personnel).
North Dakota	ND	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.

Ohio	OH	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days.
Oklahoma	OK	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days.
Oregon	OR	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days.
Pennsylvania	PA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change (unspecified for officers).
Rhode Island	RI	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 14 days PRIOR, or immediately if without notice.

South Carolina	SC	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 working days.
South Dakota	SD	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board no specific time line, but we must notify board.
Tennessee	TN	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change (includes pharmacy personnel). Must notify board if PIC is out for more than 30 days (i.e. disability).
Texas	TX	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 10 days of change.
Utah	UT	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 30 days of change and in writing.

Vermont	VT	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board notify within 48 hours, file papers within 30 days. *Refer to regs as there is a 5-step process.
Virginia	VA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 14 days.
Washington	WA	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 90 days.
West Virginia	WV	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 14 days of change.

Wisconsin	WI	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 5 days of change.
Wyoming	WY	Each pharmacy must designate a licensed pharmacist-in-charge (PIC) responsible for the pharmacy's overall compliance with state pharmacy law. Change of PIC (and/or corporate officers) must be reported to the board within 7 days.

PIC Citation / Source	Pharmacy License Requirements
Alabama Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 12/31 of even numbered years
Alaska Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires every 2 years on June 30th of every numbered years
Arizona Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Biennial registration and expiration depends on board (most likely November 2022)
Arkansas Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 12/31 of odd numbered years
California Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board); Cal. Bus. & Prof. Code (2026 nonresident PIC licensure amendment) — see Hinshaw & Culbertson client alert, 2025–26	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. License expires annually on 3/31

Colorado Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires every 2 years on October 31st of even-numbered years
Connecticut Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. License expires annually on 8/31
Delaware Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 9/30 of every even year
District of Columbia Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 5/31 of each odd numbered year
Florida Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 9/30. (next expiration: 9/30/21)

Ga. Comp. R. & Regs. R. 480-6-.02(9)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 6/30 of every odd numbered year.
Hawaii Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires on 12/31 of each odd-numbered year
Idaho Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 12/31
Illinois Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 3/31 of even numbered years
Indiana Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 12/31 of each odd-numbered year

Iowa Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 12/31
Kansas Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually
Kentucky Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30
Louisiana Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually at a time determined by the Board
Maine Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 12/31

Maryland Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires on the May 31st after its effective date
Massachusetts Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state.
Michigan Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 6/30
Minnesota Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30
Mississippi Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 12/31
Missouri Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: TBD by MO director. "shall expire on the date specified by Director"

Montana Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires 11/30 annually
Nebraska Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on the anniversary date of issuance
Nevada Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially every October of even numbered years
New Hampshire Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires 12/31 annually. Renew by 12/15 each year

New Jersey Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Foley notes from Emily Leish nor BoP site states when expiration is.
New Mexico Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires 12/31 every other year
New York Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state.
North Carolina Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Permits expires annually on 12/31.
North Dakota Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30.

Ohio Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially on 3/30 of every odd numbered year
Oklahoma Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually at a time determined by the Board
Oregon Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 3/31
Pennsylvania Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. 8/31 of odd-numbered years
Rhode Island Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires on 9/30

South Carolina Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Must renew by 6/1 of each year
South Dakota Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30
Tennessee Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. begins on the date the license is granted
Texas Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: TBD by TX. Expires on the last day of the assigned expiration month
Utah Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Based on schedule as determined by the state

Vermont Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Based on schedule as determined by the state
Virginia Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Based on schedule as determined by the state
Washington Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 5/31
West Virginia Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30

Wisconsin Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 2 years. Expires biennially 5/31 of every even numbered year
Wyoming Board of Pharmacy practice act / regulations (specific PIC-change citation not confirmed — verify with board)	Requires a pharmacy permit/license issued by the State Board of Pharmacy; a separate nonresident (out-of-state) pharmacy license is required before shipping/dispensing prescriptions to residents of this state. License term: 1 year. Expires annually on 6/30

Pharmacy License Notes	Pharmacist License Requirements
State renewal-cycle figures sourced from prior nonresident-licensing research (~2020); fee shown for reference only — verify current fee/cycle with board	Requires passing the NAPLEX (North American Pharmacist Licensure Examination) plus a jurisprudence exam (most states use NABP's Multistate Pharmacy Jurisprudence Examination, MPJE, for this state). Requires completion of state-required internship/intern hours and typically a criminal background check/fingerprinting; out-of-state pharmacists may apply via license transfer/reciprocity through the NABP e-Profile Connect system.
State renewal-cycle figures sourced from prior nonresident-licensing research (~2020); fee shown for reference only — verify current fee/cycle with board	Requires passing the NAPLEX (North American Pharmacist Licensure Examination) plus a jurisprudence exam (most states use NABP's Multistate Pharmacy Jurisprudence Examination, MPJE, for this state). Pharmacist License Citation	Controlled Substance Considerations
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Alabama classifies gabapentin as a Schedule V controlled substance and (per prior compliance review) treats Fioricet as a controlled substance in-state — both diverge from federal scheduling. Other state Schedule IV/V listings include brivaracetam, cenobamate, ezogabine, lacosamide, lasmiditan, and pregabalin (Sch. V), and propofol (Sch. IV). Dispensers of Schedule II-V substances must report daily to the state PDMP.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Arizona's prescription monitoring program (PMP) creates an electronic database of all Schedule II–IV prescriptions that are dispensed (not administered). Pharmacists must report the following by close of business each Friday for prior week for each prescription order for a controlled substance dispensed: Pharmacy name, address, telephone number, prescription number, and DEA registration number; Medical practitioner's name, address, telephone number, and DEA registration...
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per Fioricet is considered a CS in this state

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Pharmacies upload prescription data every regular business day for controlled medications listed in Schedules II to V that are dispensed to Colorado patients. Prescribers and pharmacists with registered accounts may access information on patients under their care up to three members of their healthcare teams
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: All pharmacies, nonresident pharmacies, outpatient pharmacies in a hospital or institution, and dispensers that are licensed by CT that meet all of the following conditions are required to submit to the PMP: • Dispense Schedule II-V controlled substances; • Dispense insulin drugs, glucagon drugs, diabetes devices, diabetic ketoacidosis devices, gabapentin, and naloxone (effective 1/1/2021); • Prescription supply is for greater than a 48-hour supply.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: The PMP is a system that collects information on all controlled substance (schedules II-V) prescriptions. Using the PMP website, Delaware-licensed pharmacies and prescribers who dispense controlled substances report prescription data to the PMP daily.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	DC treats cyclobenzaprine, butalbital, and gabapentin as controlled substances (a state-specific expansion beyond the federal schedules) — pharmacists cannot dispense these to DC patients without treating them as CS. Dispensers must report to the DC PDMP per the technology/format the Program specifies.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Florida Schedules PMP reporting: A prescriber or dispenser or a designee of a prescriber or dispenser must consult the system to review a patient's controlled substance dispensing history before prescribing or dispensing a controlled substance for a patient age 16 or older. This requirement does not apply when prescribing or dispensing a nonopioid controlled substance listed in Schedule V.

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Georgia's controlled-substance schedules deviate from the federal CSA in several respects: carisoprodol (Soma) is Schedule IV, ketamine is Schedule III, sodium oxybate (Xyrem) is Schedule III, ALL hydrocodone combination products are Schedule II, flubromazepam and pyrazolam are Schedule IV, and an Epidiolex-type CBD product is Schedule V. Since 7/1/2017, Schedule II-V dispensing must be reported to the Georgia PDMP within 24 hours, including mandatory "zero reports" on days nothing is dispensed.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Only Schedule II through V and drugs of concern, prescription information is to be submitted. Muscle Relaxants: M03BA02: Carisoprodol M03BA03: Methocarbamol M03BA52: Carisoprodol, combinations excluding psycholeptics M03BA53: Methocarbamol, combinations excluding psycholeptics M03BA72: Carisoprodol, combinations with psycholeptics M03BA73: Methocarbamol, combinations with psycholeptics ...
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per : Fioricet is considered a CS in this state PMP reporting: All schedule II, III, IV and V controlled substances (Federal)

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per Fioricet is considered a CS in this state.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: All dispensers of Schedule II, III, and IV controlled substance prescriptions and designated drugs of concern are required to collect and report their prescribing information. A “dispenser” is a practitioner or pharmacy who delivers a controlled substance or drug of concern to an ultimate user, but does not include: • A licensed hospital pharmacy who distributes such substances for the purpose of inpatient hospital care • A medical care facility as defined in K.S.A.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	FLAG: check LA's CS schedules since they contain some deviations from the federal list.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Dispensers are required to submit information about dispensed controlled substances to Maine's PMP, a secure online database, within one business day of dispensation. Licensed medical prescribers, pharmacists, and others as authorized by law are able to access their patient's information in the PMP before they prescribe or dispense a controlled substance. In certain circumstances, according to 22 M.R.S. § 7253, prescribers and dispensers are required to check the PMP.

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Maryland treats Fioricet as a Schedule III controlled substance (a state-specific classification, per prior compliance review). The state PDMP tracks all Schedule II-V dispensing; dispensers must report drug (Rx #, dates, NDC, quantity, days' supply), patient (name/address/DOB/ID), and prescriber (DEA #) data for every CDS fill.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Michigan schedules ephedrine and gabapentin as Schedule V (ephedrine with some OTC exceptions) and tianeptine sodium as Schedule II — all diverge from federal scheduling. Pharmacies/dispensing practitioners/veterinarians dispensing Schedule II-V must report electronically to MAPS (the state PDMP) by the end of the next business day; limited administration-based reporting exemptions apply.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Codeine-containing cough syrups that are federally Schedule V are Schedule III in Minnesota. HGH and HCG are Schedule III. Many more synthetic designer drugs are in Schedule I than are federally scheduled.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	classifies Dronabinol as a Schedule II PMP reporting: INFORMATION REQUIRED FOR SUBMISSION (1) Each entity registered by the board as a certified pharmacy or as an out-of-state mail service pharmacy that dispenses to patients in Montana shall provide the following controlled substances dispensing information to the board: (a) pharmacy name, address, telephone number, and drug enforcement administration number; (b) full name, address, telephone number, gender, and date of birth for whom the prescription was written; (c) full...
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Flunitrazepam (rohypnol) is state classified as Schedule I. PMP reporting: A pharmacist shall review the patient record and each prescription presented for dispensing for purposes of identifying: Over-utilization or under-utilization; Therapeutic duplication; Drug-disease contraindication; Drug-drug interactions; Incorrect drug dosage or duration of drug treatment; Drug-allergy interactions; and Clinical abuse or misuse. Upon recognizing any of the above, the pharmacist shall take appropriate steps to avoid or resolve the problem which might...

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Pharmacies are required to report information to the NJPMP on a daily basis to the PMP Clearinghouse using the ASAP 4.2 format. Prescriptions must be reported to the database no more than one (1) business day after the date the prescription was dispensed. Before dispensing a prescribed drug, pharmacists who have registered to use the NJPMP are able to access the NJPMP website and request the CDS and HGH, and gabapentin prescription history of the patient.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per : Fioricet is considered a CS in this state.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	NY schedules PMP reporting: Patient reports will include all controlled substances that were dispensed in New York State and reported by the pharmacy/dispenser for the past year.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: All controlled substances, schedules II, III, IV, V and drugs of concern

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per : Fioricet is considered a CS in this state, gabapentin and naltrexone PMP reporting: Effective March 15, 2017, the OHIO PMP will begin requiring pharmacies and dispensers to report reportable drugs dispensations to the SOBP via the PMP Clearinghouse. Dispensations must be reported no later than 24 hours, after dispensing the prescription, although they may be submitted more frequently. The laws and regulations for reporting to the OHIO PMP are continuously subjected to amendments.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Dispensers of Schedule II–V controlled substances are required to submit their dispensation records in real-time (within 5 minutes of being delivered to the patient or their designee) via one of the approved Data Delivery Methods. Submitted dispensation records must contain all of the required elements as defined in Appendix A: ASAP 4.2B Specifications.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Gabapentin and naloxone considered a controlled substance PMP reporting: Pharmacies submit prescription data to the PDMP system for all Schedules II, III and IV controlled substances, gabapentin, and naloxone dispensed from Oregon pharmacies and to Oregon residents from non-resident pharmacies. The protected health information is collected and stored securely.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: As of January 1, 2017, all Schedule II–V dispensed prescriptions must be reported to the Pennsylvania PDMP no later than the close of the subsequent business day (Monday through Friday) after dispensing.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Rhode Island requires reporting all controlled-substance and opioid-agonist dispensing to the state PDMP every 24 hours, including mandatory "zero fill" reports on days nothing was dispensed. Pharmacists should check the PDMP before dispensing a controlled substance to a given patient for the first time, and at least every 3 months thereafter for patients on long-term opioid therapy (also recommended before dispensing benzodiazepines/sedatives).

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: A dispenser shall submit to the PDMP, by electronic means, information regarding each prescription dispensed for a controlled substance in Schedules II, III, and IV on a daily basis. A first responder who administers an opioid antidote as provided in this section shall report to the department's Bureau of Emergency Medical Services information regarding the opioid antidote administered for inclusion in the PDMP.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Reporting frequency for monitored drugs is 1 business day, even if no monitored drugs were prescribed or dispensed. Monitored drugs are controlled substances in schedules II, III, IV, and V. Reporting is also required for naloxone administrations, opioid-related overdoses or deaths, patient lock-in information, and drug manufacturers' or distributors' data. The CSMD also has the authority to monitor other substances, namely Gabapentine (as of July 2018).
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: Every controlled substance dispensed to an outpatient must be reported, including occasional or sporadic dispensing. Reporting must be done within one day of dispensing. On days when there is no dispensing of any reportable drug, the pharmacy will file a “zero report.” Use the web site. Zero Reports are available in the Pharmacy Rx menu.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	As per : Fioricet is considered a CS in this state.

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	"Regulated drug" means: a narcotic drug; a depressant or stimulant drug, other than methamphetamine; a hallucinogenic drug; Ecstasy; cannabis; or methamphetamine. A prescription for a schedule II drug written without a future fill date shall not be filled more than 30 days after the date the prescription was issued. PMP reporting: Pharmacies and other dispensers shall report each dispensed prescription for a Schedule II, III, or IV controlled substance to the VPMS within 24 hours or one business day after dispensing.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	All pharmacies dispensing Schedule II–V controlled substances must register with and report to the state's Prescription Drug Monitoring Program (PDMP/PMP); no state-specific scheduling deviations identified in source research — verify current PMP reporting frequency and any non-federal scheduling quirks with the board.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: report any Schedule II, III, IV, and V controlled substances and drugs of concern dispensed in Washington State or to an address in Washington to the WA PMP.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Gabapentin is considered a "drug of concern". As per : Fioricet is considered a CS in this state

NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	PMP reporting: (2) The board shall establish by rule a program for monitoring the dispensing of monitored prescription drugs. The program shall do all of the following: (a) Require a pharmacy or a practitioner to generate a record documenting each dispensing of a monitored prescription drug at the pharmacy or, if the monitored prescription drug is not dispensed at a pharmacy, by the practitioner and to submit the record to the board no later than 11:59 p.m.
NABP (naplex/mpje administration); verify state-specific internship-hour and background-check requirements with board	Wyoming treats gabapentin, cyclobenzaprine, and naloxone as controlled substances, and — because the state has no exempted-product list like the DEA's — treats ALL butalbital-containing products (e.g., Fioricet) as Schedule III. Practitioners/pharmacies dispensing Schedule II-V must register in the state PDMP (worxpdmp.com) and report dispensing electronically.

CS Citation / Source	Rx Label Requirements
Ala. Code §20-2-1 et seq. (Alabama Uniform Controlled Substances Act)	Label must show the actual drug/brand or generic name and manufacturer (or abbreviation) unless the prescriber directs otherwise, plus pharmacy name/address, Rx number, date, prescriber, patient, drug name/strength, directions, and any needed cautionary statements.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must show pharmacy name/address/phone, unique Rx number, dispensing date, dispensing pharmacist's initials, drug name & strength (or generic name/strength), and for Schedule II-V drugs the federal transfer-warning statement.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements. Schedule II opioid dispensing requires a red-cap container with a "CAUTION: OPIOID, Risk of Overdose and Addiction" warning label, unless the Board's Executive Director waives the red-cap rule for a given dosage form/packaging type.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	32-1968
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Must use the state's standardized, patient-centered label format (effective 2011): drug trade or generic name + manufacturer, physical description of the pill/capsule (color, shape, imprint code) since 2006, condition/purpose if stated on the Rx, and an accessible-format label (Braille, large print, or audio) on request for patients who are blind/low-vision.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard statutory elements (pharmacy name/address, Rx serial number, fill date, drug name, prescriber, patient, directions/cautions). Outpatient opioid dispensing (excluding substance-use-disorder treatment or partial-antagonist products) requires an overdose/addiction risk warning on the label or container.
Conn. Gen. Stat. §21a-254 (PMP reporting)	Standard elements (pharmacy info, patient/prescriber names, directions, Rx number, fill date, cautionary statements, quantity, expiration date, manufacturer/distributor). Generic substitution requires disclosing the cost savings to the patient on request and labeling the substituted generic's name and manufacturer.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus the federal Schedule II-IV transfer-warning statement and an audit-trail code requirement for centrally-processed prescriptions. Nonresident pharmacies must provide a toll-free pharmacist phone line (≥40 hrs/week, ≥6 days/week) with the number printed on the label for DE patients.
D.C. Code §48-853.01 et seq.; 22-A DCMR §10300	Standard elements, with an option to omit the drug name/brand if the prescriber specifically requests it in writing under the DC Prescription Drug Price Information Act; opioid labels must carry an overdose/addiction risk warning; repackaged/prepackaged containers follow a separate labeling rule (lot number, expiration date).
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus an explicit expiration/beyond-use-date rule (the earlier of the manufacturer's date or 1 year from the fill date) and a required crime-to-transfer warning on controlled-substance labels. Repackaged/prepackaged product labels need a lot number (the manufacturer's, or one assigned by the dispenser that cross-references it).

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard label elements, with the dispensing pharmacist's identity (initials acceptable) required on the label. Separately, a Schedule II-V controlled-substance label must include an expiration date and any required cautionary statements.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must show dispenser's name/business address/phone, prescriber's name/address/phone (unless on file), patient/animal-owner name, drug name/strength/quantity, and specific directions for use (or "take according to written instructions" if separate instructions are issued).
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Container must bear a complete, accurate label identifying the drug product and the pharmacist responsible for final preparation, per federal outpatient labeling standards; compounded/repackaged product has added labeling rules (e.g., "not for further dispensing").
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard label elements (pharmacy name/address, dispensing pharmacist's initials, fill date, patient name, Rx serial number, prescriber's last name, directions, drug name/dosage/quantity). Nonresident pharmacies dispensing into IL must hold an IL nonresident pharmacy license and provide a toll-free pharmacist phone line (≥40 hrs/week, ≥6 days/week), with the number printed on the label.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Institutional-pharmacy (in-facility) labeling: patient ID, drug name (brand/generic), strength, route, quantity, pharmacist's initials, and patient location within the facility. Unit-of-use packages need at minimum drug name/strength and a control number or expiration date.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus a required generic/brand substitution labeling format: e.g., "(generic name) Generic for (brand name)" when a generic is substituted, or the reverse when a brand is dispensed for a generic order.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label (typed/machine-printed) must include pharmacy name/address/phone, prescriber name, patient full name, pharmacy's Rx ID number, fill/refill date, adequate directions for use, beyond-use date, brand or generic drug name, manufacturer/distributor name (or abbreviation), strength, quantity, and any needed auxiliary/storage labels.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard label plus a toll-free pharmacy phone number required on every label for KY residents; central-fill labels must show both the preparing and dispensing pharmacy's name/address; long-term-care labeling must follow USP Ch. 7 packaging/labeling standards.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	General Rx label content plus "Rx Only" notation on commercial containers; Schedule II labels must include pharmacy name/address/phone and the federal transfer-warning statement; remote-dispenser labels need an audit-trail ID code.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus a defined "beyond use date" (date after which the contents are not recommended for use) and generic/interchangeable-biologic labeling per §13781 when applicable.

Md. Code, Health-Gen. §21-2A-01 et seq. (PDMP)	Standard elements plus several MD-specific shipment requirements: a general notice that drug effectiveness can be affected by heat/cold/humidity exposure, a toll-free or local consumer support phone number (available ≥6 days/week, ≥40 hrs/week), written information on the process for resolving incorrectly filled prescriptions, and notice to the patient within 24 hours if a shipment will be delayed.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must be produced by the pharmacy's computerized system where possible (legible handwritten/typed label allowed only during an equipment-failure emergency); standard content requirements apply per dispensing/refill rule.
Mich. Comp. Laws §333.7333 (MAPS); Mich. Admin. Code R 338.3162b, R 338.3162d	Standard elements, with a rule that if a different brand is dispensed than what was written, the label must show both the brand prescribed and the brand actually dispensed. Centralized-processing labels must identify every pharmacy involved, which may be done via a unique identifier recognized by the delivering pharmacist.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must be permanently affixed and show the manufacturer/distributor name plus all other legally required elements; drugs that may impair driving (alone or with alcohol) require a prominent warning notice on the label.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard stock-container and prescription labeling requirements under the Board's dispensing/sanitation article (name, strength, directions, dispensing pharmacy info, etc.).
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Detailed audit-trail label/recordkeeping elements: which pharmacist reviewed the original order vs. verified the final product (if different), whether generic substitution was authorized, and any post-fill changes made after contacting the prescriber. Controlled-substance prescriptions additionally require the prescriber's address and DEA number on record. Nonresident pharmacies generally need a Missouri pharmacy license to ship/mail/deliver into the state (narrow emergency/refill exception).

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must show dispenser's name/address/phone, prescriber name, patient name, drug name & strength, directions for use, and fill date; must be securely attached to the outside of the container.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	For Schedule II-V drugs: label must show pharmacy/dispenser name & address, patient name, fill date, prescription serial number, and prescriber name; contract/common-ownership fills must also show the dispensing pharmacy's DEA number.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must show dispensing practitioner's name/address/Rx serial number, prescriber and patient names, symptom/purpose if provided by prescriber, directions for use, expiration date logic (manufacturer date or 1 year post-dispensing default), and proprietary/generic name as written.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements (name/initials of PIC or dispensing pharmacist, Rx ID number, directions, prescriber, patient, auxiliary labels). When a generic is substituted, the label must show the brand name preceded/followed by "sub," "I.C.," or "generic for"; centralized-processing labels need an audit-trail identifier code.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus a required generic/brand disclosure format ("[generic] Generic for [brand]"), a CDS cautionary label where applicable, and a rule that the patient name, drug name, and directions must appear in larger, bolder, or different-colored type than the rest of the label. Repackaged product needs a "use by" date (earlier of 1 year from dispensing or the manufacturer's expiration).
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard dispensing-unit label content per Board rule; centralized-dispensing labels must indicate which pharmacy actually filled the Rx; nonresident pharmacies must meet all NM-specific labeling/advertising/dispensing requirements that differ from federal law.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	New York uses a two-tier "critical vs. important" labeling system: patient name, directions (written in full sentences), and drug name/strength are "critical" elements that must be highlighted (color and/or bold) in ≥12-point font; pharmacy info, patient address, prescriber name, fill date, and Rx number are "important" elements that must NOT be highlighted, to preserve visual emphasis on the critical ones.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label content set by statute (date, patient name/address, prescriber name/address/phone, etc.); rule requires "filled by" plus the dispensing pharmacist's first initial and last name (not just initials) on the label.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Separate hard-copy prescription content rules for noncontrolled vs. controlled drugs (the controlled-drug version additionally requires the prescriber's DEA number). A mandatory reminder legend must state that a brand-name product requires the prescriber to hand-write "brand medically necessary." Nonresident pharmacies shipping/mailling/delivering into North Dakota must hold an ND pharmacy permit.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements, with flexibility to identify the prescriber by first initial + full last name instead of full first name. The pharmacy's DBA name (as licensed) may be used in place of its legal name; NDC/distributor name required when a generic drug is marketed at more than one strength.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	(A) Name and address of the hospital pharmacy, (B) Date and identifying serial number, (C) Name of the patient, (D) Directions for use to the patient, (E) Name of the prescriber, (F) Initials of the dispensing pharmacist, (G) Required precautionary information regarding controlled substances, (H) Such other accessory or cautionary information as may be required or desirable for proper use and safety to the patient, and (I) The name of the drug, its strength, and the number of units dispensed.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus a physical-description requirement (color/shape/imprint code) for dispensed tablets/capsules. Since a 2021 law, labels and inserts must be offered in at least 14 non-English languages spoken in Oregon (board reassesses the list every 10 years); pharmacies may contract a third party for translation.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus the pharmacy's DEA number on the label; controlled-substance labels require the federal transfer-warning statement. Prepackaged/repackaged drugs need the manufacturer's (or a cross-referenced dispenser-assigned) control/lot number and expiration date, logged separately by the pharmacy.
R.I. Gen. Laws §21-28.6-1 et seq. (RI PDMP Act)	§ 5-19.1-18 Necessity of prescription label. To every box, bottle, jar, tube or other container of a prescription, which is dispensed, a label shall be attached, the contents of which, shall be defined by the board by regulation.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	For interchangeable biologic substitution, label/auxiliary label must show the brand name (if any) and the proper name/manufacture of the biologic dispensed, with substitution language, unless the prescriber blocked drug-name disclosure; nonprescription drugs dispensed on a prescription get full Rx labeling/counseling treatment.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	For Schedule II-IV: label must show fill date, pharmacy name/address, Rx serial number, patient name, prescriber name, directions for use, and required cautionary statements; central-fill and telepharmacy labels have added source-pharmacy identification requirements.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements, with an exception for institutional/long-term-care pharmacies dispensing to inpatients. Prescribers/pharmacists must check the state PMP (CSMD) before prescribing or dispensing opioids, benzodiazepines, or Schedule II amphetamines: at the start of a new treatment episode, before each new prescription for the first 90 days, and at least every 6 months thereafter.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus specific minimum font-size rules (≥10-pt Times Roman) for the Rx number, patient name, and directions; a Schedule II-IV federal transfer-warning statement and a brand-substitution disclosure statement are required when applicable. All TX-licensed pharmacies must report dispensed controlled substances to the state PMP by the next business day; since 3/1/2020, prescribers/pharmacists must check the PMP before dispensing/prescribing opioids, benzodiazepines, barbiturates, or carisoprodol.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Minimum label content (including for compounded sterile/non-sterile preparations) set by statute; discharge-prescription labeling at hospitals has its own minimum-content rule.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements plus the drug manufacturer/distributor name and (if under 1 year from dispensing) the expiration date. Schedule II-IV labels require the federal transfer-warning statement.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Label must meet content requirements beyond the base statute (Va. Code §54.1-3410, §54.1-3463); Part VI of the Board regs sets full labeling/packaging standards, including repackaging and outside-facility dispensing.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Noncontrolled Rx: standard elements plus generic/interchangeable-biologic substitution instruction and a requirement to use tamper-resistant prescription pads/paper for written Rx. Controlled-substance Rx additionally require the patient's address, dosage form, prescriber's address, and prescriber's DEA number.
See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Prescription product must be dispensed in a pharmacy-supplied container labeled with the information required for a prescription label under Board rule.

See state Uniform Controlled Substances Act / PMP statute; verify current reporting frequency with board	Standard elements, with notable patient-identification exceptions: expedited partner therapy prescriptions may omit the partner's name, opioid-antagonist labels use the recipient's name (not necessarily the patient's), and school/authorized-entity epinephrine auto-injectors are labeled to the entity. Gabapentin was added as a state-monitored prescription drug (PMP reporting required) effective 9/1/2021, though it is not federally scheduled.
Wyo. Stat. §35-7-1018; Wyo. PDMP registration rules	Standard elements plus a physical-description requirement (pill color/shape/imprint code), with a waiver window of 120 days for new drugs and 90 days for drugs missing a reference-file description.
